18. Please add anything else that you think would be good for people to know who will attempt to provide you with professional learning opportunities.

#	Response
1	Basically, I can do most things once shown. My problem is sourcing good quality and rich tasks relating to my subject areas.
1	Great support has already been provided regarding points 2-12. Personally I would like more opportunities to develop in these areas. Thank you
1	Have a wealth of experience, happy to share. *Some* background in the social media space.
1	How we can use technology to enhance the practical skill of learning how to play and create music on an instrument?
1	I find online tutorials / working my way through content a lot easier than sitting back and passively absorbing a lot of information, as I get sidetracked fairly easily. I find a smaller group much more beneficial in learning about this kind of content.
1	I think if each of the questions above are addressed through being shown, then I know I can proceed with some confidence. The key, however, is pratice, practice, practice.
1	It would be valuable to have more time allocated to planning and developing both tools and resources for the use of ICT in the classroom. It would also be important to allow time for small groups of staff to work together in developing units of work, edublogs and resources in specific department areas. Another consideration would be time allowance for staff to team teach and develop collegial initiatives; or for staff to assist or observe in other ICT classrooms of more experienced or innovative teachers.
1	Regular support group to ask for assistance on a regular basis or when difficulty is encountered.
1	something about the requirement of my subject areas
1	Time to focus on this area is the main problem I have - The recent PL sessions have made me focus on finding time each week this term, probably at home, to work through this area. This will happen in my own time as I never find the space in my working day to address. My aim is to spend at least 2 hours each week through Term 3 specifially addressing my BOLG - I am excited but terrified at the same time about this - just being honest!
1	Whilst I have stated for most of the questions that I need extra help I am actually somewhere bewteen being able to do it ('it' being related to the question) with a little more practice or having tutorial. I also find it very useful to have step by step instruction sheets that I can follow, so that if I am working independently at home I can solve some problems or questions I may have myself with a little bit of trial and error.
